

- ✓ Least expensive and most efficient technology
- ✓ Lowest maintenance and electrical cost
- ✓ Permittable compliant approaches to wastewater disposal
- ✓ Meets zero discharge criteria
- ✓ Evaporation, aeration and bioremediation
- ✓ Patented Evaporation Technology
- ✓ Evaporation capacity from 20 GPM to well over 10,000 GPM

Over 10 years of International Evaporation Experience

## ENHANCED WASTEWATER EVAPORATION SYSTEMS

### APPLICATIONS

Oil and Gas	Mining
Landfill	Power Plant
WWT	Storm and Flood Water
Food and Beverage	

**MAXIMIZE EFFICIENCY | MINIMIZE WASTEWATER**

**RETURNING PURE WATER VAPOR BACK INTO  
THE HYDROLOGIC CYCLE**

evaporationworks.com

## EVAPORATORS DESIGNED TO LAST AND PERFORM

Capable of evaporating wastewater with the highest and lowest pH, and challenging high levels of TSS and TDS.

### APPLICATION CAPABILITY

- ✓ Adjustable droplet size and overspray control
- ✓ 180° vertical arm adjustment
- ✓ 360° rotational atomizing arm
- ✓ 1 to 10 ft atomizer height
- ✓ Variable droplet size spectra, 70 - 125 micron average
- ✓ Atomizer speed up to 15,000 RPM
- ✓ Safe servicing platform

### THE HIGHEST SPEED TO HORSEPOWER ATOMIZER ON THE MARKET PROVEN INDUSTRY BEST EVAPORATION RATES

#### VARIMAX 20

Maximum Evaporation Capacity  
20 GPM | 4.5 m<sup>3</sup>/h

Electricity consumption  
4 kW/h |

The Varimax 20 is fully expandable to operate at 40 GPM.

#### VARIMAX 40

Maximum Evaporation Capacity  
40 GPM | 9 m<sup>3</sup>/h

Electricity consumption  
7 kW/h

Depending on the weather conditions, one Varimax 40 unit can evaporate over 1,000 barrels of wastewater per day.

## MegaMist 300

Maximum Evaporation Capacity  
300 GPM | 68 m<sup>3</sup>/h

Electricity consumption  
50 kW/h

## MegaMist +

Customizable Evaporation Capacity  
starting at 300 GPM to  
over 10,000 GPM

The MegaMist + has the industry best micron-droplet spectra to dry air mix ratio Vs competitive equipment.
